

YES WE SCAN! 2016

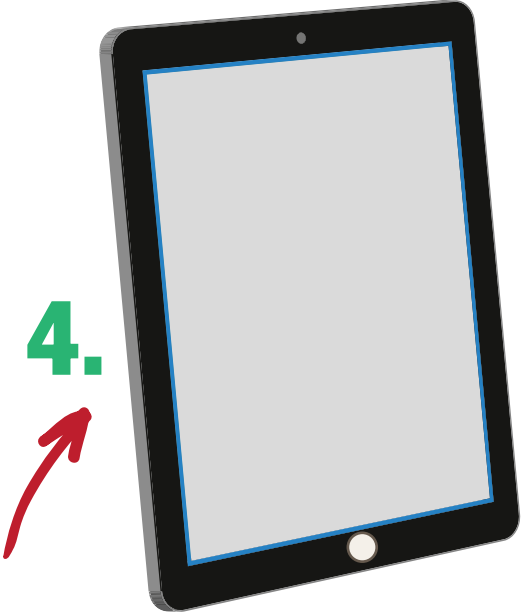

A QR CODE is a matrix code created to allow its contents to be decoded at high speed. An ever increasing number of tasks can be achieved using a QR code. (i.e. Link to websites, send SMS to a phone, transfer a phone number, and provide more text.)

1.

That's it! You can now successfully scan any QR CODE that's located around our campus. These codes carry a lot of information for everyone.

4.

2.

DOWNLOAD QR READER (QRAFTER APP)

There are a lot of FREE apps to choose from. Once you've downloaded the QR CODE reader on your iPad and phone, you're ready to scan any code. Hold your iPad over a QR CODE so it's clearly visible with the iPad's screen. Most scanners perform the task automatically, while others will ask for action, like open link. You will need to follow these directions.
